

The MVP progressive cavity grinder pump provides superior performance for the most demanding pressure sewer designs out there. Providing unsurpassed pressure, the MVP offers unparalleled scouring velocity, preventing buildup and extending the life of the system.

The semi-positive displacement design allows the pump to provide nearly constant flow no matter what the back pressure is in a given application, making it the ideal design for pressure sewer application.

No matter what the site conditions are, the MVP progressive cavity pump can provide a low cost, low maintenance option, allowing for years of trouble free service.

Product Features:

- Low speed, high torque non-jamming grinder
- Hardened, anti wear grinding ring and cutter
- Produces higher pressures for better pipe scouring
- Ideal for installation on flat, hilly, rocky or wet sites
- Potted epoxy cord seal
- Continuous duty motor
- Comes standard with overload protection in them
- Available with or without rail kit
- Available in preassembled / multi-pump configurations
- Ideal replacement for existing pressure sewer pumps

Specifications				
Model	HP	Discharge	Dimintions (L x W x H)	Weight
MVPS15CE	1.5	1.25"	16" x 12.5" x 28.5"	88 lbs.

3 phase models coming soon

Construction		
Number	Description	Material
1	Handle	Steel
2	Cable	Buna-N
3	Top Cover	Cast Iron
4	Motor Housing	Cast Iron
5	Mechanical Seal	Silcon Carbide
6	Pump Volute	Cast Iron
7	Stator	Buna-N
8	Screw / Cutter Casing	Cast Iron
9	Pump Screw	304 SS
10	Cutter	440 SS
11	Cutter Ring	440 SS
12	Base	304SS
